# G-13.mft 3.5"

coin validator

## Most flexible and secure coin validator

The NRI G-13.mft sets the industry standard. By using the unique MFT validation technology utmost coin security is guaranteed. The G-13.mft has high flexibility through different models, interfaces and sorters.

### High security:

- Highest coin validation security using the unique MFT Multi-Frequency Technology
- Detection of coin material by three coil pairs together with proven optical diameter measurement
- Simultaneous evaluation of 24 measurement parameters for 32 coin channels
- Protection against string manipulation
- Optical monitoring of coin path

### Flexibility:

- Inhibit of single coins or coin groups via DIL switch
- Teach function for up to 8 coins/tokens as standard
- Powerful WinEMP software for downloading complete device and coin configuration
- On-site tool HENRI+ to easily update coin and configuration data sets as well as firmware

### Versatility:

- Multiple machine interfaces available
  - serial S1
  - serial MDB
  - ccTalk, also via USB connection
  - parallel, also binary or serial impulses
  - SGI (Simple Gaming Interface) with fast coin acceptance for Casino applications

### Accessories:

- Midi and Mini front plate
- Wake-up sensor for low-power applications
- 3-way sorter standard s<sup>2</sup> SSD-3001/2/3/4
- 3-way high speed sorter s<sup>2</sup> HSD-3000

With the NRI G-13.mft you can relax – your machine is working with the best in class coin validation technology.
